

International Symposium Long Covid Invitation

October 12th 2021 · 4:00 – 7:00 pm CET

Dear Ladies and Gentlemen,

we hereby invite you to our first virtual **International Symposium Long Covid on Tuesday, October 12th 2021 from 4 pm – 7 pm CET.**

Millions of people around the world are suffering from the long term effects of Covid-19. You are invited to join us to better understand and treat Long Covid by attending our first International Symposium Long Covid.

Key international researchers and health professionals working in this field will share their extensive knowledge and insights. **The event will take place as an online web conference on the website www.long-covid.de/events.** You can also register [here](#). Participation is free of charge and also possible without registration.

The symposium will be held in English.

We look forward to welcoming both healthcare professionals with an interest in treating this condition as well as patients suffering from Long Covid.

Join us to foster an overarching dialogue on the long-term effects of corona among patients, physicians and scientists as we work together to make critical progress in tackling this condition. As participants, you can actively engage in the exchange via the chat function.

We look forward to seeing you.

Speaker / Moderator

Prof Hangming Dong

Vice Director, Department of Respiratory and Critical Care Medicine, Nanfang Hospital, Southern Medical University, Guangzhou, China

Since 2020, Prof. Dong has been involved in the prevention and control of Covid-19, the diagnosis and treatment of patients, and participated in the consultation of critically ill Covid-19 patients.

Dr Panagis Galiatsatos

Assistant Professor, Division of Pulmonary & Critical Care Medicine, Johns Hopkins School of Medicine, USA. Co-Chair, JHHS Health Equity, Office of Diversity, Inclusion, & Health Equity. Co-Director, Medicine for the Greater Good

Dr. Galiatsatos is one of the faculty that assists in the Post-Covid-19 clinic, seeing many post-Covid-19 patients with a variety ongoing symptoms and morbidity.

Dr Peter Wright

Lead of Sport & Coaching Sciences, Faculty of Health & Life Sciences, Oxford Brookes University, UK. Scientific Director of Handheld Health (a university start-up company)

Dr. Peter Wright has experienced Long Covid himself first hand and also been part of a group of researchers who received government funding to develop a digital rehab option for Long Covid patients. This has led to the founding of HandHeld Health, an Oxford Brookes University start-up company.

Dr Stan Windsor

Lecturer, Oxford Brookes University, UK. CEO, HandHeld Health

As qualified advanced personal trainer, Dr. Stan Windsor has worked with pulmonary rehabilitation at the John Radcliffe hospital (Oxford) to improve the provision for Long Covid and wider respiratory conditions. With his extensive experience within both the health technology and sport science areas, Stan sits at the intersection between the application and scientific grounding within the HandHeld-Health performance.

Dr André M. Schmidt

CEO MEDIAN Group, Germany. CEO Priory, UK

Dr. André M. Schmidt, MEDIAN Group CEO and CEO of Priory has campaigned for the role of rehab from the beginning of the corona pandemic. By intervening in politics and with payers, he ensured that rehab could continue to fulfill its care mandate. Urgently needed services in the field

of addiction and psychosomatics were maintained, while Covid-19 patients were admitted to relieve acute clinics. Additionally he supported and promoted from the beginning the development and launch of new Corona-rehab concepts as well as digital rehab offers so that MEDIAN took care for more than 3.000 post-Covid patients since the first admission on April, 14th 2020.

Dr Per Otto Schüller

Medical Director Cardiology and Pneumology, MEDIAN Klinik Flechtingen, Germany

Dr. Schüller is speaker of the MEDIAN Medical Board Long Covid. He contributed to the development and implementation of www.long-covid.de. Since April 2020 Dr. Schüller has treated numerous patients with Long Covid. He also contributed to the patient guideline Long Covid that will be published within the next weeks. Dr. Schüller is involved in several scientific projects in reference to the post-acute sequelae of Covid-19.

Dr Christoph Altmann

Medical Director Cardiology, MEDIAN Klinik Bad Gottleuba, Germany

Dr. Christoph Altmann is a member of the MEDIAN Task Force interdisciplinary Covid Reha since March 2020 and of the MEDIAN Task Force Long Covid Rehabilitation since March 2021. He also added to the development of the MEDIAN Corona Recovery Score. Dr. Altmann contributed to the Development and Implementation of www.long-covid.de and the founding and organizing of the Patient Webseite <https://long-covid.me>. Being the Head of the local interdisciplinary Long Covid Program, he treated many patients with Long Covid.

Dr Laura Golenia

Head of Research and Innovation, MEDIAN Unternehmensgruppe, Germany

Dr Laura Golenia coordinates all initiatives related to Long Covid at MEDIAN. She is a member of the MEDIAN Medical Board Long Covid and led the Development of the long-covid.de website.

Dorothee Altmann

Department of Psychology, University Witten/Herdecke, Germany

Dorothee Altmann focusses on the psychological aspects of a Long Covid rehab. Inspired by the MEDIAN Medical Board Long Covid, she is also conducting intensive literature research on innovative Long Covid forms of therapy.
